

ES SLITTER

Application : 2 shafts center type winding, suitable for slitting/rewinding various label stocks, papers & laminated materials...etc.

(The model for slitting/rewinding various adhesive tapes is EST)

Specification :	Machine Width : 1.0M/1.3M/1.6M	Max. Unwind O.D : 1000mm
	Rewind Core I.D : 77mm	Min. Slitting Width : 25mm (depend on rewind O.D)
	Max. Rewind O.D : 400mm / 600mm	Machine Speed : 250M / Min

Feature :

1. Equipped with the separated shaft type unwind base, automatic web guide and automatic tension control system.
2. Driven by connective 3 A.C motors and rewind tension system is changeable for tension control on air shaft & linear speed control on differential shaft.
3. Center type winding and the rewind arm is movable when the rewind O.D is getting bigger. It is for keeping the same distance in between finished roll and main roller to make perfect rewind.
4. Finished rolls are unloaded by connected swing out type unloading rack, which is convenience on core unloading.
5. Slitting by shear cutter and razor blade, which was designed for multi-purpose materials converting. The material trimming by strong blower A.C motor control.
6. Central control system is as PLC unit with LCD touch panel, which has friendly operation for all data setting.

Optional Parts :

1. Unwind Pick-Up Lift : For loading jumbo roll on the machine quickly and time saving.
2. Connected Splice Table : Splice materials smoothly at 5 degree or horizontal in order to decrease production loss.
3. Special Unwind Base : Separated type with shaftless hydraulic core chuck can be equipped for efficient and quick performance on jumbo roll change.
