

EST SLITTER

Application : 2 shafts center type winding, suitable for slitting/rewinding various adhesive tapes

Specification :

Machine Width :	1.0M/1.3M/1.6M	Max. Unwind O.D :	800mm
Rewind Core I.D :	77mm	Min. Slitting Width :	25mm (depend on rewind O.D)
Max. Rewind O.D :	400mm / 600mm	Machine Speed :	200M / Min

Feature :

1. Unwind base is as connected or separated one, able to be built on your request.
2. Unwind tension is controlled by powder brake with auto tension controller.
3. Driven by connective 3 A.C motors and rewind tension system is changeable for tension control on air shaft & linear speed control on differential shaft.
4. Slitting by air score knife and razor blade, which were designed for multi-purpose materials converting.
5. Center type winding and the rewind arm is movable for keeping the same distance in between finished roll and main roller to make perfect rewind, also equipped with connected swing out type rack for unloading finished rolls.
6. The trim unit is as traverse winding type. (center winding driven type is also available in option)
7. Central control system is as PLC unit with LCD touch panel, which has friendly operation for all data setting.
8. All of electrical devices are compliant to the latest European CE regulation for safety operation.

Optional Parts :

1. Unwind Pick-Up Lift : For loading jumbo roll on the machine quickly and time saving. (For shaft type unwind base)
2. Noise Reduction Hood : For attenuating the production sound when the machine is running. (For separated base)
3. Special Trim Winding : Center type traverse winding unit, suitable for double side tape & material with release treatment on the surface.
4. Web Guide : To keep materials wound out at one position. (For separated unwind base)
5. Separated unload rack : Able to unload the finished rolls on the upper rewind shaft easily.
6. Special Unwind Base : Separated type with shaftless hydraulic core chuck can be equipped for efficient and quick performance on jumbo roll change.
