

FDA 2 SHAFTS LOG ROLL CUTTER

Application : Suitable for cutting various adhesive tapes. (2 shafts cutting a time, double on production capacity).

Specification : Machine Width : 1.0M/1.3M/1.6M Max. Cutting O.D : 160mm
Cutting Core I.D : 26 – 77mm (1”– 3”) Min. Cutting Width : 2mm

Feature :

1. Width setting is controlled by servo motor with ball screw and guide rails to make accuracy movement.
2. All functions are operated under LCD touch panel control, which is operator friendly and easy for data setting.
3. Central control system is as PLC unit, in which has materials cutting memory mode and all of electrical devices are compliant to the latest European CE regulation for safety operation.
4. Knife feeding is controlled by servo motor; the cutting speed is adjustable in 3 stages.
5. On maintenance, the machine can be communicated with our computer by telecom line for instant check & service.
6. The knife carriage on FD is fixed type, it has one blade to cut on 2 shafts a time, FDA has two blades to cut on 2 shafts a time and equipped with knife angle auto adjustment for making roll surface smoothly.

Optional Parts :

1. Other Size Cutting Shaft : It can be made as per the required core I.D.
2. Cutting Supporter : For supporting log roll when cutting core below 38mm.
3. Air type Cutting Shaft : To improve the cutting accuracy when the tolerance of paper core I.D is too big.
4. Safety Cover : To protect operator during the production, which is compliant to the CE regulation.
5. Special Introduction : This model has design of obverse/reverse type frame, 1 operator can use both machines for bulk production if set up 2 machines face to face.
