

FJ LOG ROLL CUTTER

Application : Suitable for cutting masking, double side, foam & cloth tapes.

Specification : Machine Width : 1.0/1.3/1.6M Max. Cutting O.D : 450mm
Cutting Core I.D : 77mm (3") Min. Cutting Width : 3mm

Feature :

1. Cutting shaft and circular blade are driven by A.C motor with inverter control, which is able to set RPM and running direction obverse/reserve on different requests.
2. Width setting is controlled by servo motor with ball screw and guide rails to make accuracy movement.
3. All functions are operated under LCD touch panel control, which is operator friendly and easy for data setting.
4. Central control system is as PLC unit, all of electrical devices are compliant to the latest European CE regulation for safety operation.
5. Knife feeding is controlled by servo motor, the cutting speed is adjustable in 3 stages.
6. Equipped with knife angle auto adjustment by servo motor control, cutting angle can be changed from -9 to +9 degree automatically for making roll surface smoothly.
7. Equipped with internal/external chuck, which is suitable to clamp big/small log rolls, and the cutting shaft end supporter is also adjustable for this purpose.
8. Connected safety cover to protect operator during the production, which is compliant to the CE regulation.
9. On maintenance, the machine can be communicated with our computer by telecom line for instant check & service.

Optional Parts :

1. Air Type Cutting Shaft : To improve the cutting accuracy when the tolerance of paper core I.D is too big.
2. Loading Device : Connected type log roll loading lift table is convenience to put heavy roll into the shaft.
3. Sharpening Device : Grinding knife on the machine to save time for taking blade off.
